

gelatinous structure defines at least one exposed edge which is rounded.

25. (NEW) A method of manufacturing a decorative candle display comprising the steps of:

a) pouring a quantity of a candle wax material into a container defining an open top; and

b) partially embedding at least one gelatinous structure into the candle wax material such that the gelatinous structure is observable via the open top of the container.

26. (NEW) The method of Claim 25 further comprising the step of:

c) applying heat to the gelatinous structure.

27. (NEW) The method of Claim 26 wherein:

the gelatinous structure defines at least one exposed edge; and

step (c) comprises applying heat to the gelatinous structure at a temperature level and duration sufficient to round the at least one exposed edge.

28. (NEW) The method of Claim 27 wherein step (c) comprises applying heat at a temperature level and duration sufficient to impart a sheen to the gelatinous structure.

29. (NEW) The method of Claim 26 wherein step (c) comprises applying radiant heat to the gelatinous structure.

30. (NEW) The method of Claim 26 wherein step (c) comprises applying convection heat to the gelatinous structure.

31. (NEW) The method of Claim 30 wherein step (c) is accomplished through the use of a hot air dryer.
